## **DETAILED ACTION**

### ***Election/Restrictions***

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 19-23, drawn to power conversion module having a piezoelectric, classified in class 310, subclass 328.
- II. Claims 16-18, drawn to a power conversion module with piezo-stack , classified in class 310, subclass 348.

The inventions are distinct, each from the other because of the following reasons:

- 2) Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of using together. The invention in Group I does not require the limitation of the angles and the invention of group II does not require the mechanical stop mounted in the distal end of the housing.
- 3) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4) Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2834

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
